Procontrol's ProxerNet Worktime and Attendance System

Printing registration sheets, preparing statistics, reports, editing events, handling shifts, time zones and more

- Reports like registration sheets, list of those present (evacuation list is an optional part of porter module), searches, fingerprint actions, logs on changing authorizations, rejections, etc.

- Recording holidays, days off – setting, registering, counting holidays per employees, and displaying information on the registration sheet, including all days on leave, sick leaves for the whole calendar year

- Balance calculations, monthly closures

- The easy-to-use interface makes many kinds of flexible filtering, grouping possible; data in txt, csv and excel format can be exported.

- Using ProxerNet software and VRecNet video surveillance system together the entry and exit snapshots can be indexed. The camera at the entrance gate, when showing the access card, takes a picture of the employee. In the ProxerNet software clicking at the data record of the event the photo can be displayed. With this technology, users entering with someone else's card can be filtered out.

- Special work orders can be created, assigned to groups and persons.

- Work schedule of persons and groups can be fixed according to the predetermined work orders. The arrangements can be modified when needed

- Setting rights, authorizations for leadership, like
    - access to employees worktime schedule and modifying it
    - managing days on leave, delegations, transfer, etc.
    - filtering and summarizing

- Setting rights, authorization for employees
    - employee cannot change facts (real data, like time of arrival, exit and breaks)
    - facts cannot be changed unperceived by manager with the necessary rights either; system shows manually altered data, and logs the modification
    - Via the **ProxerNet Web** we-based interface, accessed by employees with their own login credentials, employees may check their registration sheet. They may also initiate changes, but these changes must be approved by administrator, managers with the elevated rights.

- With the related ProxerNet Worknet module the production management system functions become available: the employees can be assigned to cost centre, Value Stream, cell group, cell, task by default, even on a daily bases or more times per day, filtering and summarizing possibilities for analyses. (This module may need customization due to the distinct structure and workflows of different firms.)

- To certain payroll programs the worktime data export is already available (like Nexon Bér, Maxoft Wisual Bér, Kulcs-soft Bér), and Procontrol keeps on working on data connections to other softwares, and takes in developing such data connections.

- With recommendation of MABISZ (Association of Hungarian Insurance Companies)

- Own personnel and rented staff can also be in the worktime-attendance register, and they can be separated at payroll.

- To follow-up changes in legislation Procontrol offers its support contract.

- Handling physical access barriers and gates (barriers, turnstiles)

- Handling highlighted time periods and displaying them in the summary of the time sheet.

- Access rights for external partners (drivers, vendors, guests, cleaners) and follow-up their time spent inside the premise

- Trainings on installing, launching the system and on updates

- IT:
    - operation may happen inside the own system or in cloud
    - technical requirements: Server minimum: Intel i3/2GB RAM/50GB/1GBit LAN storage Windows + MSSQL Express 2008; Client minimum: Intel Core 2 /2GB RAM /20GB/100MBit LAN/1280x768 resolution

Related software modules:

- **ProxerNet – ProxerWeb:** web-based event editing, handling; employees can check their own time attendance register, events, balance; may initiate change, which can be approved by the administrator

- **ProxerNet – Visitor registration, porter module:** Issuing visitor cards, registering new visitors, enter and exit, handling visitors' data, like name, company name, phone number, etc. and the data of the visit (whom they visit, reason of entry), authorization, list of those present (for evacuation list)

- **ProxerNet – VisualPorta:** Comparing the picture of the camera to the photo in record. Real time display of moves, adding comments manually

Procontrol's ProxerNet Building Monitoring Software

The ProxerNet is an advanced modular smart building management system developed by Procontrol Ltd. containing the following modules (available combined or separately):

- Access control with visitor management, authority management
- Time and attendance
- Parking lot management and billing, pay parking
- Key and value storage system
- Smart Building automation systems (BAS), HVAC control
- Wellness Control
- Cabinet lock management
- Queue management, ticketing
- Real Time Location System (RTLS) – personal tracking
- Conference control
- Production Management.

Procontrol provides compatible data storage devices building a complex automation solution.

Pick the modules you need for your customized ProxerNet system. Pricing is depending on number of users, employees, keys, cards, network licences, support level.

Support for all of Procontrol-brand access control hardware, expandable with other brands and models on customer request.
